

# **PRIMARY FIVE DRAFT SYLLABI**

## **P5 ENGLISH ABRIDGED CURRICULUM 2021**

You are welcome to the Abridged English Syllabus. The syllabus has been abridged to help you cover all the content as you prepare learners to join Primary Six. The P5 class for this year missed almost the Primary Four content due to the COVID-19 pandemic. You should endeavour to cover tenses taught in Primary Four. That content has been merged with that of Primary Five Topic 1, **Vehicle Repair and Maintenance, 1A Parts of a Vehicle**

During the teaching/learning process, you need to employ methods of teaching such as demonstration, discovery, role-play, group work and dramatization, among others. These methods will give learners adequate opportunity to practise the vocabulary and the structures they have learnt.

After effectively handling all the topics in Primary Five, you should guide your learners in revising what they were taught in the previous classes. This, however, does not mean that you have to give them a lot of pen and paper examinations but you need to devise other strategies of revising the previous work with them.

## TERM 1

### TOPIC 1: VEHICLE REPAIR AND MAINTENANCE

#### Overview:

This topic will enable learners to develop knowledge of the crucial vehicle parts and identify tools required in vehicle repair and maintenance. Through this topic, the learner will also develop appropriate language related to vehicle repair and maintenance.

Previous P4 Grammar content on tenses has been included to enable the learners to cover what they missed.

Before you teach Vocabulary, begin by teaching the tenses that are covered in Primary Four. The content is included under Grammar.

## Mathematics Abridged Curriculum for primary schools in Uganda

### Primary 5

#### Term I

#### Topic 1: Set Concepts

**8 periods.**

#### Overview:

Sets in this class will form a basis for extending the understanding of numbers. The content on sets for primary 4 that is found so critical has been added to the content of primary 5. The teacher will be required to use both reference books of primary 4 and primary 5 to get the details of the content. As a teacher you should know that during lock down learners have been engaging in many sorts of things, you are advised to draw examples from everyday life of the learner related to sets and ensure that all learners are engaged at all times. The primary 4 and 5 content under sets is the same except for Venn diagram. In this case, the first content is for primary 4, however, you need to cover it extensively to cover also the same content for primary 5. Note that through experiment learners form and name equal and equivalent, union and intersection of sets from a variety of instructional materials. Discovering the members that form union and intersection sets will make much sense if done practically.

Competences	Content	Suggested Activities
<ul style="list-style-type: none"><li>• Forms and names sets</li><li>• Identifies and distinguishes equal and equivalent sets, empty set</li><li>• Identifies number of members in a given set</li><li>• Lists members of intersection and union sets</li><li>• Draws Venn diagrams</li><li>• Identifies union and intersection of sets using Venn diagram</li></ul>	<ul style="list-style-type: none"><li>• Equivalent, equal &amp; empty set.</li><li>• Number of members in given sets.</li><li>• Union and intersection of sets</li><li>• Venn diagram</li></ul>	<ul style="list-style-type: none"><li>• Forming and naming sets</li><li>• Identifying and distinguishing, equal and equivalent sets of various named objects e.g. fruits, sticks, stones and animals.</li><li>• Counting number of members in given sets.</li><li>• Naming/ signing examples of empty sets.</li><li>• Drawing Venn diagrams</li><li>• Identifying and writing/ braille common members of sets.( intersection)</li><li>• Listing members of the</li></ul>

		union set
--	--	-----------

## Suggested Competences for Assessment

### The learner:

- Distinguishes between equal and equivalent sets
- Identifies empty set
- Forms union and intersection of sets using Venn diagram

## Topic 2: Whole numbers

**6 periods.**

### Overview

This topic that runs from primary one throughout primary level provides the basis for learners to develop the attitude of determining to solve problems in real life by calculation. It is when the learners can properly count, read and write whole numbers that they can eventually be introduced to operations on whole numbers. In this topic place values keep on increasing by a digit depending on the class. In primary 4 learners are supposed to work with numbers up to 99,999 and in primary 5 up to 999,999. Whatever the case, the strategies used to make the learners understand are the same. Bearing in mind that learners may not have covered the work of primary 4, let them work with numbers up to 99,999 before extending to 999,999. Use real objects and real life examples to make the topic enjoyable and light to the learners.

**Rounding off to the nearest whole number is left out for the next class to avoid overloading this topic.**

Competences	Content	Suggested Activities
<ul style="list-style-type: none"> <li>Arranges numbers in their correct place on the place values chart: ones, tens, hundreds, thousands, etc.</li> <li>Counts whole numbers up to 999,999</li> <li>Writes/braille numbers in expanded form</li> <li>Writes/braille numbers in words</li> <li>Reads/ signs and writes Roman numbers up to fifty</li> </ul>	<ul style="list-style-type: none"> <li>place value up to 999,999</li> <li>value up to 999,999</li> <li>whole numbers up to 999,999</li> <li>Expanding numbers up to 6 digits</li> <li>Roman numerals up to L</li> </ul>	<ul style="list-style-type: none"> <li>Identifying place values up to 6 digits.</li> <li>Drawing a number line to show numbers in 100s from 0 – 2000.</li> <li>Using an abacus or table to show place value and values of various numbers.</li> <li>Using values of digits in given numbers to expand them.</li> <li>Reading/ signing and writing Roman numbers up to fifty</li> </ul>

## Suggested Competences for Assessment

### The learner

- Identifies values and place values of numbers
- Writes/ braille numbers in expanded form
- Converts Roman numerals to Hindu Arabic numbers and vice versa.

### Topic 3: Operations on whole numbers

8 periods.

#### Overview

The teacher will select some few addition numbers from the reference books of primary 4 and few from the primary 5 reference books. This can be done concurrently within 3 periods of 40 minutes. Regrouping involves a group of base ten numbers. (TENS, HUNDREDS, THOUSANDS---), Engage learners in practical addition, subtraction, multiplication and division. Emphasize regrouping and let the learners discover how it is effectively done. Learners will discover that multiplication is repeated addition and division is repeated subtraction. Create scenario-based problems from the learners' context where learners are required to apply their knowledge to solve problems involving mixed operations. It will be interesting if group work is encouraged among learners.

Competences	Content	Activities
<ul style="list-style-type: none"><li>Adds whole numbers up to 6-digits with or without regrouping</li><li>Solves simple word problems involving addition</li><li>Subtracts whole numbers up to 6-digits with or without regrouping</li><li>Solves simple word problems involving subtraction</li><li>Multiplies 3-digit and 4-digit numbers by 2-digit numbers</li><li>Solves simple word problems involving multiplication</li></ul>	<ul style="list-style-type: none"><li>Addition of whole numbers</li><li>Subtraction of whole numbers</li><li>Multiplication by 2 digit natural numbers</li><li>Division of whole numbers by up to 2-digit numbers including by 10.</li><li>Mixed operations</li><li>Numbers in Base 5</li></ul>	<ul style="list-style-type: none"><li>Making simple addition problems using numbers up to 999,999.</li><li>Subtracting numbers up to 999,999</li><li>Solving problems involving addition and subtraction in real life situations.</li><li>Multiplication by 2 digit natural numbers</li><li>Working out division using long division and describing each step.</li><li>Reading/ signing and solving word problems in real life situations involving mixed operations.</li></ul>

<ul style="list-style-type: none"> <li>• Divides whole numbers by 2-digit numbers</li> <li>• Solves simple word problems involving division</li> <li>• Works out problems involving mixed operations</li> <li>• Counts numbers in base five</li> <li>• Adds and subtracts numbers in base five.</li> </ul>		<ul style="list-style-type: none"> <li>• Counting numbers in Base Five.</li> <li>• Computing problems involving addition and subtraction of numbers in Base Five</li> </ul>
--	--	---

### Suggested Competences for Assessment

The learner:

- Uses the four operations correctly
- Counts in base 5
- Solves problems involving operations

### Topic 4: Patterns and sequences

**6 periods.**

#### Overview:

Learners will understand the meaning of patterns and sequence through first observing where patterns are. e.g. tiles, jackfruit, pineapple etc. Take them to where they can identify the patterns and sequences in their environment before introducing patterns and sequences. Show learners the importance of learning patterns and sequences in their real life. Let learners find the next numbers in a given pattern by adding and subtracting, multiplying and dividing of numbers. Eventually, learners will discover the LCM and GCF through multiplication and division patterns. In the same topic, learners will discuss and form patterns by increasing & decreasing progression. Let learners discover and discuss triangle numbers, composite and square numbers using models.

### **Suggested Competences for Assessment**

#### **The learner**

- a) Forms patterns from shapes
- b) Lists/ signs numbers to form patterns
- c) Finds LCM and GCF

#### **Term II**

#### **Topic 5: Fractions**

**15 periods.**

#### **Overview:**

Fractions are part of our daily lives, in many instances the knowledge of fractions is required to solve problems, let them be land, money or sharing property. Learners should be engaged in practical identification of fractions with and without the same denominator including equivalent fractions. Learners should experience writing fractions in the lowest terms and use the basic operations to solve problems involving fractions. Give learners opportunity to discover the reciprocals of fractions practically. Although fractions are covered in first term in Primary 4 and in second term in primary 5, the content in this topic is in such a way that it links up well, so let the learner see that link when involving operations on fractions. Learners should work in groups to help each other to interpret and solve word problems involving fractions. Give them a chance

to communicate their answers to the whole class. The concept of decimal fractions doesn't exist in primary 4, learners are expected to experiment and discover the difference between whole numbers, proper fractions and decimal fractions by using fraction strips. So, accord them necessary guidance. Learners will discover the change in writing place values and use the idea of place value to write the place value of decimals up to the hundredths. e.g.  $1/10$ , as 0.1 where 0 is the place of ones. For operations on decimal fractions the emphasis should be put on arranging the digits. Group work to aid easy reading, interpreting and solving problems with decimal fractions will be much easier when the problems are contextualized to help the learners to relate to daily life.

Competences	Content	Activities
<ul style="list-style-type: none"> <li>• Demonstrates proper, improper and mixed numbers using objects and diagrams</li> <li>• Changes mixed numbers to improper fractions and vice versa.</li> <li>• Orders fractions with the same and different denominators</li> <li>• Adds fractions with the same and different denominator</li> <li>• Subtracts fractions with the same and different denominators</li> <li>• Multiplies fractions with fractions</li> <li>• Finds reciprocals of fractions</li> <li>• Divides proper fractions by proper fractions</li> <li>• Dividing fractions by natural numbers</li> <li>• Finds place values of digits in decimal numbers</li> <li>• Converts decimals to fractions and vice versa</li> <li>• Adds decimals up to</li> </ul>	<ul style="list-style-type: none"> <li>• Proper, improper fraction and mixed numbers.</li> <li>• Equivalent fractions.</li> <li>• Ordering fractions</li> <li>• Addition and subtraction of fractions</li> <li>• Multiplication of fractions</li> <li>• Division of fractions</li> <li>• Place value of decimals up to hundredths.</li> <li>• Decimals on number lines.</li> <li>• Conversion of decimals to fractions and vice versa.</li> <li>• Addition and subtraction of decimals up to hundredths</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrating with examples proper, improper fractions and mixed numbers using objects diagrams e.g. <math>\frac{1}{2}</math>, <math>\frac{2}{3}</math>, <math>\frac{5}{4}</math></li> <li>• Renaming/ signing mixed numbers as improper fractions and vice versa.</li> <li>• Writing/brailleing equivalent fractions</li> <li>• Working out problems involving equivalent fractions.</li> <li>• Orders fraction with the same and different denominators</li> <li>• Adding fractions with same and different denominators. --	--	--

### **Suggested Competences for Assessment**

#### **The learner:**

- a) Names/ signs equivalent fractions and illustrates them.
- b) Distinguishes between proper and improper fractions and writes/ braille mixed numbers
- c) Changes proper fractions to improper fractions and vice versa
- d) Orders fractions
- e) Carries out the four fundamental operations on fractions.
- f) Solves real life problems related to fractions
- g) Finds place value and use place values of digits to find values.
- h) Converts decimal to fractions.
- i) Adds decimal fractions.
- j) Subtracts decimal fractions

## Topic 6: Lines, Angles and Geometric figures

14 periods

### Overview

Having the idea of geometric figures is very important as the knowledge can help learners at later stage in construction. Learners should identify and describe 2 and 3 dimensional figures around them. Note: in primary 4 curriculum the 2 and 3 dimensional figures are given as separate topics but because both feed into a similar topic in primary 5, they are combined. Learners can collect and model the different figures from soil or clay to make them more engaged. This topic should be as engaging as possible. Remember, learners are from the lockdown where they have been engaging with many geometric figures incidentally, they should be involved in discovering lines, angles and other figures.

Having geometry sets will be a must for all learners for successful completion of the topic. In their groups, learners discover complementary and supplementary angles. Before the teacher embarks on teaching parallel and perpendicular lines, learners should identify objects in the classroom which have those lines.

Competences	Content	Activities
<ul style="list-style-type: none"><li>• Matches 2 and 3-dimensional figure pictures to their English names</li><li>• Draws and constructs right angles</li><li>• Draws and constructs parallel lines</li><li>• Constructs circle and regular hexagon</li><li>• Finds lines of folding symmetry of a rectangle, square and special triangles</li></ul>	<ul style="list-style-type: none"><li>• 2-dimensional figures</li><li>• 3 dimensional figures</li><li>• 2-dimension figures : triangles, squares, rectangles.</li><li>• Right angles</li><li>• Parallel and perpendicular lines</li><li>• Angles.</li><li>• Circles and regular hexagons.</li><li>• Simple lines of folding symmetry - rectangle - square - special triangles</li></ul>	<ul style="list-style-type: none"><li>• Matching pictures of figures to their names in English.</li><li>• Drawing 2- and 3-dimensional figures.</li><li>• Constructing simple 2-dimensional figures.</li><li>• Making models of common solids and displays them.</li></ul>

### Suggested Competences for Assessment

#### The Learner:

- a) Identifies, draws and models 2-and 3 dimensional figures.
- b) Draws right angles correctly
- c) Identifies, draws and constructs parallel and perpendicular lines.
- d) Correctly constructs a hexagon.
- e) Folds square, rectangular, triangular sheets of paper to form lines of symmetry.

- f) Uses geometric instruments to construct angles, circles, squares and regular hexagons.

## Topic 7: Data Handling

14 periods.

### Overview:

Learners have been collecting information on different items whether organized or not. Learners will continue to collect information on items with similar characteristics and discover its representation in form of pictures. This content was supposed to be covered in primary 4. It is a basis for learners organizing and presenting information on the line and bar graphs. Line and bar graphs are found in both primary 4 and primary 5. The teacher will cover the content concurrently referencing from the textbook of P4 and of P5 at the same time. This topic should be made fun and engaging, drawing examples from the learner's experiences.

Competences	Content	Activities
<ul style="list-style-type: none"> <li>• Uses tally marks to collect and group data</li> <li>• Draws and interprets information on pictographs</li> <li>• Draws, displays and interprets data on line and bar graphs</li> <li>• Determines and uses average of the bar and line graphs</li> </ul>	<ul style="list-style-type: none"> <li>• Tally mark</li> <li>• Pictographs</li> <li>• Scales on the horizontal and vertical axes.</li> <li>• Bar graphs</li> <li>• Line graphs</li> <li>• Average.</li> </ul>	<ul style="list-style-type: none"> <li>• Grouping information using tally marks.</li> <li>• Drawing pictographs</li> <li>• Drawing scales on the horizontal and vertical axes</li> <li>• Drawing, reading, interpreting and displaying data on line and bar graphs</li> <li>• Finding average of collected data</li> </ul>

### Suggested Competences for Assessment

#### The learner:

1. Collects and groups data from home and community.
2. Displays data using tally marks.
3. Draws, interpret and display data on the bar and line graphs
3. Works out average of data.

**Topic 8: Time****12 periods.****Overview:**

Time is under measurement in both primary 4 and primary 5 classes. However, the content will be handled logically to enable learners to understand Time. Using real or model clocks learners should be given opportunity to manipulate the clocks, cut outs, jigsaws as they tell/ sign or show time. The teacher can use cooperative learning and experimentation. Learners should begin with what they already know about time which was covered in primary 2 and 3.

Competences	Content	Activities
<ul style="list-style-type: none"><li>• Uses am and pm to tell/ sign time</li><li>• Converts units of time i.e.<ul style="list-style-type: none"><li>-hours to minutes and vice-versa</li><li>- days to hours and vice-versa</li><li>- weeks to days and vice-versa</li><li>-months to days and vice-versa</li></ul></li><li>• Interprets the calendar</li><li>• Finds duration</li><li>• Solves problems related to time, distance and speed</li></ul>	<ul style="list-style-type: none"><li>• Time on the 12-hour clock.</li><li>• Conversion of units of time</li><li>• Duration.</li><li>• Time, distance and speed.</li></ul>	<ul style="list-style-type: none"><li>• Discovering when to use minute to and minute past, pm and am.</li><li>• Calculating how many minutes in an hour, hours in a day, (Conversion of time)</li><li>• Interpreting the calendar and communicating the findings</li><li>• Finding duration</li><li>• Calculating distance, time and speed</li></ul>

## **Suggested Competences for Assessment**

### **The learner:**

1. Tells/ signs time on 12-hour clock using digital and analogue Clocks
2. Converts bigger units of time to small ones
3. Finds duration.
4. Solves word problem involving time, distance and speed.

## **Term III**

### **Topic 9: Money**

**9 periods.**

#### **Overview:**

This topic is found in both primary 4 and 5 syllabuses under the same theme measurement. Since some learners might have missed studying in primary four, it will be covered in primary 5. During lock down some learners have been transacting business with their parents / guardians, therefore, they have some knowledge about money. It is very important that the teacher refer to such knowledge to carry out this topic practically. Learners should be taken to the nearby shop or market to observe how selling and buying is done and how change is found. Learners will use the idea of operations on numbers to discover addition, subtraction, multiplication and division of money. There is no need to spend much time on addition of money because learners have already gained the skill of the use of the operations. It has been realized that in the two classes some content is exactly the same so referencing will be done from the textbooks for primary 4 and primary 5 at the same time.

<b>Competences</b>	<b>Content</b>	<b>Activities</b>
--------------------	----------------	-------------------

<ul style="list-style-type: none"> <li>• Identifies Uganda currency (coins and notes)</li> <li>• Solves practical problems related to buying and selling using Uganda currency. (Problems related to buying and selling involving; <ul style="list-style-type: none"> <li>- addition</li> <li>- subtraction</li> <li>- multiplication</li> <li>- division</li> <li>- completing table of bills</li> </ul> )</li> <li>• Works out simple profit and loss</li> <li>• Calculates costs and prices</li> </ul>	<ul style="list-style-type: none"> <li>• Money</li> <li>• Buying and selling</li> <li>• Profit and loss</li> <li>• Costs and prices</li> </ul>	<ul style="list-style-type: none"> <li>• Adding, subtracting, multiplying and dividing money</li> <li>• Completing the table of bills</li> <li>• Using role play to carry out buying and selling.</li> <li>• Finding selling price, change, profit and loss.</li> </ul>
---	--	---

### **Suggested Competences for Assessment**

#### **The learner:**

- Uses the four operations on money.
- Completes table of bills.
- Calculates profit and loss
- Calculates selling and buying prices when loss or profit is given

### **Topic 10: Length, Mass and Capacity**

**14 periods.**

#### **Overview:**

This topic is handled in both classes primary 4 and primary 5. It has been covered in lower primary using non - standard units. Using standard units, learners need to practically measure and record their findings and use a measure chart to help them convert units of length. The content for primary 4 has been integrated in the content for primary 5. Therefore, reference books for the two classes will be used concurrently to ensure that no content is left out. Learners should be engaged in discovering perimeter.

The learners can derive the formula by themselves after carrying out practical activities. Encourage cooperative learning among learners.

Competences	Content	Activities
<b>Length</b> <ul style="list-style-type: none"> <li>Converts metres to centimetres and vice versa.</li> <li>Finds perimeter of rectangles, squares and triangles</li> <li>Finds area of squares, rectangles and triangles.</li> </ul> <b>Mass</b> <ul style="list-style-type: none"> <li>Converts kilogrammes to grammes and vice versa</li> <li>Solves word problems involving mass</li> </ul> <b>Capacity</b> <ul style="list-style-type: none"> <li>Converts litres to millilitres and vice versa.</li> <li>Measures capacity in litres and millilitres</li> </ul>	<ul style="list-style-type: none"> <li>Lengths in m, cm and mm.</li> <li>Perimeters in cm and mm.</li> <li>Areas in <math>m^2</math> and <math>cm^2</math></li> <li>Mass in kg and g.</li> <li>Capacity in litres and ml.</li> </ul>	<ul style="list-style-type: none"> <li>Measuring length in m, cm and mm</li> <li>Converting metres to centimetres and vice versa</li> <li>Finding perimeter in cm and mm</li> <li>Finding area in <math>m^2</math> and <math>cm^2</math></li> <li>Measuring mass in kilograms and grams</li> <li>Converting kilograms to grams and vice versa</li> <li>Measuring capacity in litres and millilitres</li> <li>Converting litres to millilitres and vice versa</li> <li>Solving word problems involving measuring</li> </ul>

### Suggested Competences for Assessment

#### The learner:

- Measures length and mass using correct instruments.
- Converts from one unit to the other
- Calculates area and perimeter of plane figures.
- Solves word problems involving length, mass and capacity.

### Topic 11: Integers

6 periods.

#### Overview:

This topic is introduced in primary 5 but it is an important topic as the idea of integers can ably be used in plotting and drawing graphs. Integers should be introduced by relating them to real life experiences. Like using a thermometer, falling off a tree or into

a ditch. Learners should discover by themselves the meaning of negative and positive integers through drawing and using number lines inside and outside the classroom.

Competences	Content	Activities
<ul style="list-style-type: none"> <li>• Draws number lines</li> <li>• Identifies positive and negative integers</li> <li>• Orders/ arranges negative and positive integers using a number line.</li> <li>• Uses symbols =, &gt; or &lt; to compare integers</li> <li>• Adds integers using a number line.</li> <li>• Adds integers without using a number line.</li> <li>• Subtracts integers using a number line.</li> <li>• Subtracts integers without using a number line.</li> <li>• Solves simple word problems involving integers.</li> </ul>	<ul style="list-style-type: none"> <li>• Positive and negative integers.</li> <li>• Ordering integers</li> <li>• Comparison of integers</li> <li>• Addition and subtraction of integers.</li> <li>• Simple word problems.</li> </ul>	<ul style="list-style-type: none"> <li>• Identifying positive and negative integers</li> <li>• Comparing and ordering/arranging positive and negative integers</li> <li>• Adding and subtracting integers using a number line</li> <li>• Adding and subtracting without using a number line</li> <li>• Solving word problems involving integers</li> </ul>

### Suggested Competences for Assessment

#### The learner:

- a) Draws number line and compare positive and negative numbers.
- b) Uses symbols to compare integers
- c) Adds integers and Subtract integers.
- d) Solves simple word problems involving integers

### Topic 12: Algebra

**14 periods.**

#### Overview:

Algebra has been done since primary one. Making reference to the previous work will help learners to reflect and actively participate in this topic. It is advisable to use learners real life experiences when writing algebraic expressions and forming equations. Remind the learners regularly to be organized as they solve equations,

Competences	Content	Activities
<ul style="list-style-type: none"> <li>Writes mathematical expressions</li> <li>Collects like terms and writes algebraic expressions</li> <li>Finds missing values in addition and subtraction</li> <li>Finds missing values in multiplication</li> <li>Finds missing values in division</li> <li>Solves simple word problems involving equations</li> </ul>	<ul style="list-style-type: none"> <li>Simple equations.</li> <li>Using the four operations.</li> <li>True mathematical statements.</li> <li>Like terms.</li> <li>Expressions in algebra.</li> <li>Simple word problems involving algebra.</li> </ul>	<ul style="list-style-type: none"> <li>Writing/brailling mathematical expressions</li> <li>Collecting like terms</li> <li>Finding missing values</li> <li>Solving simple word problems involving equations</li> </ul>

### Suggested Competences for Assessment

#### The learner:

- Simplifies algebraic expressions
- Solves simple equations.
- Forms simple word problems involving equations and solves them.

## PRIMARY FIVE

### TERM I

#### TOPIC 1: LOCATION OF UGANDA ON THE MAP OF EAST AFRICA

##### Overview

A learner needs to know the name of his/her country, its location and size. He/she is expected to locate his/her country in relation to the neighbouring countries. He/she must also learn how to use a compass, lines of latitude and longitudes to locate his/her country. The teacher should revise with the learner the elements of a map and their importance. He/she should also know the number of districts that make up Uganda.

##### Learning Outcome: The learner,

The learner is able to demonstrate an understanding and use of map reading skills to interpret information about one's immediate and distant environment and the interactions of human and other factors.

COMPETENCES	CONTENT	SUGGESTED ACTIVITIES
<ul style="list-style-type: none"><li>Identifies the districts that form Uganda</li></ul>	<ul style="list-style-type: none"><li>Revision of the districts that form Uganda.</li><li>Revision of the cardinal and semi cardinal points for identification of neighbouring countries.</li></ul>	<ul style="list-style-type: none"><li>Identifying different districts of Uganda.</li><li>Identifying neighbouring countries using cardinal and semi-cardinal points</li></ul>

COMPETENCES	CONTENT	SUGGESTED ACTIVITIES
		<p>Uganda's neighbours.</p> <ul style="list-style-type: none"> <li>• Modelling the map of Uganda with her neighbours using clay and seeds.</li> <li>• Tracing the map of Uganda on hard cards and cut it out for learners.</li> </ul>

### Competence for Assessment

- Draw a map of Uganda showing the neighbouring countries.
- Which country is found in the South West of Uganda?
- List three major features of a map.

## TOPIC 2: PHYSICAL FEATURES IN UGANDA

### OVERVIEW

The learner is expected to explain what physical features are as well as name and locate major physical features in Uganda. He/she should discuss the formation of different types of physical features. The learner should be: - given the opportunity to examine any physical feature in his/her environment. - guided to explain how different types of physical features influence people's lives and other living things. - guided to develop the skills of caring for physical features. problems and solutions associated with different types of physical features will be covered in subsequent classes i.e., Primary six and seven.

### Learning outcome

The learner is able to explore, understand and appreciate the value of one's immediate and distant environment for better health and harmonious living.

#### Competences for Assessment

- Mention two reasons why mountains and highlands are important to Ugandans.
- Name any mountain in Uganda formed by volcanic action.
- State two ways in which lakes and rivers can cause problems to people.
- Give two ways in which females and males can protect lakes and rivers.

### TOPIC 3: CLIMATE OF UGANDA

#### OVERVIEW

The learner should explain what climate is and locate the major climatic regions of Uganda on the map. He/she should discuss how climate influences human activities. The learner should also be able to identify the different problems associated with climate and list possible solutions to these problems.

#### Learning Outcome

The learner is able to understand and appreciate the value of climate to all living things and explain ways of maintaining climate for better health and harmonious living.

COMPETENCES	CONTENT	ACTIVITIES

### Competences for Assessment

- Name two problems faced by people in dry areas.
- Which two human activities are carried out in wet areas of Uganda?
- Write two activities people should do to maintain good climatic conditions.

## TOPIC: 4 VEGETATION OF UGANDA

### Overview

**Topic 5;** In Primary Four, the learner was introduced to different types of vegetation in his/her district. He/she visited various types of vegetation in his/her environment and saw the way people and other living things benefit from it. The learner was encouraged to acquire skills of caring and preserving the vegetation for future use. In Primary Five, the learner is expected to exercise his/her knowledge and skills of conserving the vegetation. In addition, the learner will understand factors that influence vegetation distribution in Uganda, and how it meets people's demands for food and settlement.

**Learning Outcome:** The learner shows, understands and appreciates the importance and value of vegetation for better living.

COMPETENCES	CONTENT	SUGGESTED ACTIVITIES
<ul style="list-style-type: none"><li>Identifies factors that influence vegetation distribution.</li></ul>	Factors that influence vegetation distribution <ul style="list-style-type: none"><li>- Rainfall.</li><li>- Fertile soils.</li><li>-Altitude).</li><li>- Land forms (mountains, plateau and valleys).</li></ul>	Drawing the map of Uganda showing areas with different rainfall patterns and resultant vegetation.

COMPETENCES	CONTENT	SUGGESTED ACTIVITIES
<ul style="list-style-type: none"> <li>Discusses human activities that affect vegetation</li> </ul>	Human activities that negatively affect vegetation.	Visiting any possible site where the vegetation has been destroyed. Planting trees, grasses and flowers in the school compound.

### Competences for Assessment

- Write any two activities you do at school or your home to look after vegetation.
- Mention two uses of trees in Uganda.
- List four types of vegetation

## TERM II

### TOPIC: 6 NATURAL RESOURCES IN UGANDA

#### Overview

**Topic; 5** This topic introduces the learner to the natural resources in Uganda. It leads him/her to know the different types of natural resources and their location on the map of Uganda. The learner will also learn about their value, uses and how they contribute to the economic growth. He/she will also identify problems associated with their development as well as possible ways of solving them.

**Learning Outcome: The learner,**

identifies the natural resources in their immediate and distant environment, how people use them to earn a living and analyse bad practices that destroy natural resources

COMPETENCES	CONTENT	SUGGESTED ACTIVITIES

## TOPIC: 6 THE PEOPLE OF PRE-COLONIAL UGANDA `

### Overview

In Primary Four, the learner learnt about the people in his/her district and how they use both the physical and social environment to earn a better living. In Primary Five, the learner should know the major ethnic groups of people, their origin and settlement in Uganda. He/she should also know the social and political organisation of these ethnic groups. Since every human being struggles to have improved living, the learner should also study the economic organisation of the pre-colonial societies in Uganda, the food and cash crops which were grown by those different ethnic groups.

**Learning Outcomes:** The learner promotes and practices desirable knowledge and values in the society and show respect for his/her culture and those of other people; demonstrate an understanding of and use map reading skills to interpret information.

### TOPIC: 7 FOREIGN INFLUENCES IN UGANDA

#### OVERVIEW

In the last topic, the learner identified the different ethnic groups and how they migrated into Uganda. In this topic, the learner will cover why the foreigners came to Uganda, their contribution and influence. The Arab traders from Asia were the first to come to Uganda. They came with guns, cloth, carpets, cowrie shells, beads and other goods which were exchanged for slaves, ivory, gold, salt and animal skins. Later, Europeans who were explorers, Christian Missionaries and colonial administrators also came. Both Arabs and Europeans influenced the social, economic and political life of Ugandans.

**Learning Outcomes:** The learner understands the importance of the interdependence among people and nations and demonstrate an understanding of and use of map reading skills to collect information.

### Competences for assessment

Ask learners to:

- List the groups of foreigners that came to Uganda.
- Name three good things foreigners brought to Uganda.
- Identify two places in your district which were started by foreigners (school, hospital, farm, etc.).
  - (i) Find out in which year it started.
  - (ii) The people who started it.
  - (iii) Who is responsible for it today?

## TOPIC 8 HOW UGANDA BECAME A NATION

### OVERVIEW

In the last topic, you covered how foreigners came into Uganda, with their culture, systems of leadership and ways of trade. These

led to bringing together of many kingdoms and other areas to form one country. This country is Uganda.

The learner should explain how Uganda came to be one nation under the British rule. The learner will be exposed to various

agreements (Buganda, Toro, Ankole and Bunyoro) and even how the British extended their rule to the rest of the nation. The learner

will be introduced to the influence of British rule on Uganda.

**Learning Outcome:** The learner explores, understands and appreciates the value of Uganda as a nation.

- Mention three ways in which African traditional culture was weakened by Britain.
- Explain five new things which were introduced by the British Government in Uganda.

## TOPIC 9 THE ROAD TO INDEPENDENCE

### Overview

From the previous topic, the learner is aware that Uganda during the colonial administration experienced many political, social and

economic changes. The road to independence was not a smooth move to Ugandans. There were a number of civil strives as

Ugandans during that time resisted colonial rule. However, there were a number of good things which were introduced in Uganda and

these are cash crops, formal education, Christianity, Islam, better medical services, taxation, laws and regulations.

In this topic, the learner will learn that the system of administration had unique characteristics. The legal system was not favouring the

Africans. This forced the formation of the Legislative Council (LEGCO) which had some Africans nominated to represent people in

their areas. The Africans who had fought both in the First and Second World Wars came back and joined their brothers and sisters at

home to demand and fight for independence.

The Traditional Kings, chiefs and leading personalities played key roles in mobilizing people and forming the first political parties to

struggle for independence.

**Learning Outcomes:** The learner is able to:

- demonstrate knowledge and appreciate the African's collective responsibility in bringing order and social justice.
- understand the structures and functions of government and demonstrate willingness to participate in the democratic and civic

process of one's country.

## TOPIC: 12 Population, Size and Distribution

### Overview

The learner has idea of numbers of learners in different classes in the school. This is called population. Every morning there is roll call

and the totals are put together, this is a simple census. In this topic, the learner will learn about the population of Uganda, its growth and the importance of a census in a country. He/she will

also learn the size of the population and its settlement patterns or distribution. The high and low population densities have problems to

the social, economic and political environments. The learner therefore needs to equip him/herself with possible solutions to the problem. This topic demands the learner as a member of the young generation to develop positive attitudes of controlling population growth through family planning, and better reproductive health practices.

**Learning Outcome:** The learner promotes and practice desirable values in society and show respect for his/her own and other cultures.

## **PRIMARY FIVE**

### **Preamble**

In Bridging the Primary five curriculum, some topics from Primary four were shifted in this class knowing that they were not handled in that very class. While others in this class have been merged together that have the same or related content. CRE is a subject which is designed to develop morals and acceptable values, as a teacher you are required to use appropriate methodology to develop values like; co-operation, sharing, appreciation, endurance, patience, responsibility, care, respect, trustworthiness, love, togetherness, honesty, self-reliance, joy, concern, privacy, independence, faithfulness and obedience among others. Pick values that befit what is being taught.

### **What was changed/merged and the justification**

Topic: 2 of primary four Curriculum, “Gods’ People and the Law” was merged with topic: 3 of primary five curriculum “Gods’ Word for us”. The content of these two topics are similar, that’s why the matter is condensed in one topic.

Topic: 1 “Faith in the curriculum of primary five came as the fourth topic in the same curriculum. Faith as a topic is in that position because the first three topics were shifted from primary four, it helps the learner to begin from known to un known.

The Christian community is topic 5 term 2 in primary four curriculum. The topic is put in this position because, after teaching Faith as a topic, the learner will easily understand and appreciate the concept of Christian Community as a topic in that, faith builds up confidence and hope to one another and live in harmony.

Topic: 7 “Witness”, 8 “Making our decisions as Christians” and 9 “Peace” were all merged. “Witness” these two topics 8 and 9 from primary four curriculum term three. The concept of these three topics relates clearly. If someone makes a good decision, it will lead to peace in life hence being a good witness of Christ.

Topic: 9 “Relationship with God “in primary five curriculum has been merged with topic: 10 “Hope” of the same curriculum. Relationship as a topic came first because it is very difficult to teach the topic “Hope” to the learner before teaching him / her, having a good relationship with God.

### **Topic: God’s people and the law**

#### **Term one**

#### **Overview:**

God’s people and the Law which is extracted from primary four, is a major topic that was chosen because it can swallow up the sub topic: “God’s Word for us” from primary five. When you talk about the law, it embraces the whole Bible where you have to talk about the Bible itself (the Word of God), the structure of the Bible, the books of the Bible, the people who wrote the Bible, the Bible characters among whom was Moses

who received the Ten Commandments. It further helps the learner to understand the centrality of the Bible in the life of a Christian.

**Topic: The Christian Community.**

**Overview:**

This topic is extracted from the curriculum of primary four term two. A Christian community is a group of Christians working together and sharing what they have. In the early church Christians shared what they had. There are different groups of Christian communities which believe in Jesus Christ as saviour. The different groups of Christian believers can be compared to the human body. The church has the duty to bring people to God. Therefore, one needs to appreciate the differences in worship, customs, names and the practices of the early church which brings God's blessings. The topic relates, "to Jesus our example in service", in a way that Jesus spent His life serving others.

## TEACHERS' GUIDE P.5

### ABRIDGED CURRICULUM OF ISLAMIC RELIGIOUS EDUCATION

#### Preamble

Islamic Religious Education (IRE) is a key learning area on the primary school Curriculum. Therefore leaving a topic without teaching it, may cause loss to the learner. It is one of the subjects that have been abridged through merging topics and considering the most essential competences for the purpose of regaining lost time with minimal learning loss. In Religious Education, learner's reflection on what they have learnt is very important. It enables them to learn from religion and not merely about religion. In this abridged curriculum some content has been merged, brought backward and pushed forward
